SSD6202 Kit Content

- SSD6202 Controller Card
- Low-Profile bracket
- Quick Installation Guide

SSD6202 Hardware

Front View

SSD6202 Hardware Installation

Step 1. On the rear of the SSD6202, remove the four screws that secure the unit's heat sink to the PCB.

After removing the screws, carefully remove the heat sink from the SSD6202

Step 2. These 2 screws are used to install the NVMe SSD's.

Step 3. Please remove the screws on the right side of the SSD6202. Gently insert the SSD into the slot.

Step 4. Refasten the screw to secure the SSD.

Step 5. Repeat Steps 3 & 4 to install the remaining SSD.

The following example shows two M.2 NVMe SSD's installed into Port 1 & 2:

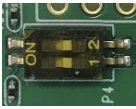

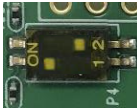

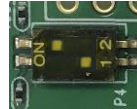

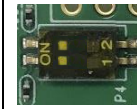

Step 6. Align and install the heatsink; on the rear of the SSD6202, refasten the 4 screws that were removed in step 1.

Note: The SSD6202 can create RAID arrays via RAID Switch settings. (You can also create RAID arrays using the UEFI, CLI & WebGUI tools).

RAID Switch: four options are available; when the system starts, the SSD6202 will automatically create the specified array using the hosted NVMe SSD's.

			
None	JBOD	RAID 1	RAID 0

Note: Using the RAID Switch to configure an array will destroy any data stored on the NVMe SSD's. Make sure to backup any important data before using this feature.
